Hardware RAID Box for Tolling

- Keep Systems Running
- Rapid Data Recovery
- Plug & Play

24/7

The ARAID Box automatically backs up system files and data in a disk drive to a second drive. If one of the drives fails, the other will take over operations and keep the computer running. Utilized with Advantech's ACP Series of 2U Rackmount Chassis, the ARAID disk array allows systems to continuously run for minimized disruptions and rapid data recovery.

BEFORE — Long Downtime

- Remove the crashed HDD/SSD

Remove

Re-install

AFTER — No Downtime

- **Hot-Swap** the crashed HDD/SSD

Good drive takes over
